

## Nasúla Wóslolye - Wičháŋpi Kiŋ

Hi! I'm Brain the Robot! – **Háu! Mas'wičhaša hemácha na Nasúla emáčiyaŋe ló.**  
And I have some quick facts about stars. – **Na wičháŋpi ečhíyatáŋhaŋ takúku očíčiŋakapi wačhíŋ.**

A star is a massive, hot ball of gas found in space. – **Wičháŋpi waŋží gmigméla na tókkel okíhika tšáŋka na makhá kiŋ letáŋhaŋ tókkel okíhika tšéhaŋl yaŋké.**  
The nearest star to Earth is the Sun. – **Wičháŋpi waŋ kitáŋla uŋkíkhiyela yaŋké kiŋ hé Wí kiŋ é.**

There are about 200-400 billion stars in our galaxy. – **Wičháŋpi optáye tšáŋka waŋ él uŋk'úŋpi kiŋ lél wičháŋpi kšoktáthehika opáwiŋge tóna yukhé.**

Each galaxy contains hundreds of billions of stars and there is estimated to be over 100 billion galaxies. – **Wičháŋpi optáye tšáŋka kiŋ iyóhila él héčhuŋp-s'e wičháŋpi kšoktáthehika opáwiŋge tóna yukhé, na agná, wamákhognaka él wičháŋpi optáye tšáŋka kšoktáthehika opáwiŋge tóna yukhé.**

Stars usually burn for 1 and 10 billion years. – **Wičháŋpi kiŋháŋ eyášna ómakhá kšoktáthehika waŋží hetáŋhaŋ, kšoktáthehika wikčémna heháŋyaŋ ilé.**

Check it out! – **Čha ečháš wičháŋpi ečhétkiya waŋyaŋg nážiŋ po!**

All you have to do is look up at the clear, night sky! – **Wičháŋpih'a čháŋna áta khilí!**  
Go star gazing tonight and check back for more Brain Facts with me, Brain the Robot! – **Haŋhépi kiŋ maŋpíya waniče háŋtaŋ iyúthapi na heháŋl kúpi na akhé Nasúla Wóslolye eyápi húnŋh yunáyečhičhiyapi kte ló.**
