

Nasúla Wóslolye - Maǎpiya

Hi! I'm Brain the Robot! – **Háu! Mas'wíchaša hemácha na Nasúla emáčiyape ló.**
And I have some quick facts about clouds. – **Na maǎpiya ečhíyatanǎḥaḥ takúku očíčiyakapi wačhíḥ.**

A cloud is a group of tiny water droplets, light enough to float in the air. – **Maǎpiya kiḥháj mní čikčik'ala ečhéča, na líla kap'óžela čha uḥkíwaḥkab kaḥwóhwoḡ ahíyaye.**

Clouds are formed when water from the Earth evaporates into the sky. – **Mní eyá makǎátaḥḥaḥ oyáḥe čháḥna, waḥkátakiya iyáyiḥ na kimáǎpiya.**

Rain, snow, sleet and hail fall from clouds. – **Maǎpiya etáḥḥaḥ maǎážu na wá na waḥ'éča na wasú hiḥháj okíhi.**

There are many different types of clouds. – **Maǎpiya owé óta yukǎé.**

Fog is a type of cloud that appears very close to the ground. – **P'ó eyápi kiḥ hé maǎpiya héčha, iḥše makhíčaḥtagya yaḥké.**

Other planets in our Solar System have clouds. – **Wamákhá uḥmá kiḥ húḥḥ iḥš-eyá maǎpiya thúḥ.**

Venus has thick clouds made of sulfur-dioxide. – **Venus ektá líla maǎpiya šokšóka óta éyaš hél niyé phičá šni.**

While Jupiter and Saturn have clouds made of ammonia. – **Na Jupiter na Saturn héčhiya maǎpiya kiḥ was'ámna ečhéča.**

That is so neat! – **Áta khilí, iḥchéye!**

Things to think about on a cloudy day. – **Maǎpiya ečhétkiya táku óta slolwáye šni, níš?**

Go check it out, then come back for more Brain Facts with me, Brain the Robot! – **Čha hená iyúkčaḥpi na ečháš kúpi na akhé Nasúla Wóslolye eyápi húḥḥ yunáyečhičhiyapi kte ló.**
